Zebra
PLATE

Designed to Fit Every Direction of Your Life.

Everything else has been left behind. The idea of how a switch should-be, has transformed to an idea Of how a switch could-also-be and this has changed perspectives. Introducing zebra , the finest balance Between function and form. The completely flat form of the mechanical switches has redefined norms Completely.
The brilliant functionality of the switch adds ease to life and spurs luxury in a daily living

AN ISO 9001 :2015 CERTIFIED COMPANY
Koncept®
Electrik Zone

CONSTRUCTION & FEATURES:

- Good Design
- In accordance with IS/IEC 60898-1
- Available in B & C curves
- Rated short circuit breaking capacity: 10000A (10kA)
- High speed and high breaking capacity mechanism
- Power loss values are much lower than the specified values of IS/IEC standard making in the most energy-efficient MCB
- Trip free mechanism
- No Line - Load bias
- Rapid action
- Provision for auxillary part attachment

MINIATURE CIRCUIT BREAKERS (MCBs)

MCB's or miniature circuit breakers are electro mechinical devices which protect an electric circuit from an overcurrent. The overcurrent, in an electrical circuit, may result from short circuit, overload or faulty design.

An MCB is a better alternative to a fuse since it does not require replacement once an overload is detected. Unlike fuse, an MCB can be easily operated and thus offer improved operational safety and greater convenience without incurring large operating cost.

The surface of MCB has been designed in such a way that does not allow dust to settle on its surface. The MCB thus retains its new look for years. Miniature circuit breakers are used to protect lower current circuits and have the following specifications.

- Rated Current Rating - Amperes
- Short circuit Breaking Current Rating - Kilo Amperes (KA)
- Operating Characteristics - 'B' or 'C' curves
